### **Sprint Waste Services LP Announces Leadership Changes**

HOUSTON (Jan. 26, 2015)—Sprint Waste Services LP, a leading regional industrial waste services provider, today announced Dave Nelson, Sprint Waste’s former director of shared services, has been named the new president and chief executive officer, succeeding partner Will Swinbank.

The move allows Swinbank to focus on strategic initiatives, growth opportunities, and developing and enhancing the company’s culture. Will Swinbank, along with partner Reagan Swinbank, will continue to be involved in the operation of the company.

Nelson was the logical choice for this role, Will Swinbank said, bringing more than 25 years of experience in management and operations in various industries. “Dave brings exceptional focus and strong experience in improving processes, tools and technology to better position our organization for the years ahead,” Swinbank said. “We are convinced Dave will enable us to develop and grow our business while providing excellent leadership and structure.

“Dave has been a significant contributor to Sprint Waste’s growth and success for the past four years,” Swinbank added. “We’re confident in his ability to lead our company through the challenges and opportunities ahead.”

Nelson said, “It’s a privilege to lead Sprint Waste Services in our mission to provide our customers with unparalleled service and value across the entire waste stream. I’m humbled by the Swinbanks’ confidence in me and honored to lead our talented and hard-working team.”

Prior to joining Sprint Waste Services, Nelson served in senior management roles at companies including Pennzoil–Quaker State, Shell Lubricants and Hewlett Packard.

#### **About Sprint Waste Services**

Sprint Waste Services LP is a premier, full-service provider of solid waste services to commercial, industrial and large manufacturing companies along the Gulf Coast. Since 2006 the company has provided waste collection, equipment rental, hauling and turnkey managed solutions across enterprises from small industrial centers and construction sites to the world’s largest energy companies. Today the company’s 500-plus employees at 10 locations help customers handle their entire waste stream in a cost-effective and environmentally responsible way.
