

For All Your Construction Waste Needs

Sprint Waste can handle all your temporary and permanent waste needs with the largest privately owned waste hauling fleet on the Gulf Coast. We have an extensive inventory of 20-, 30- and 40-yard rolloff containers; as well as stationary and self-contained industrial compactors. We own and operate a construction and debris (C&D) type IV landfill on the southwest side of Houston and a type V recycling center in Port Arthur, Texas. The Sprint Waste Fort Bend County Landfill is open to the public and accepts most construction and demolition debris.

Construction Debris Hauling Services

Personalized Solutions.
Personalized Service.

Some Services We Provide:

- 20-, 30- and 40-yard open-top containers
- 60-yard demo/debris trailers for tree clearing and demo

Focused on Your LEED Certification

Combining the Best People, Technology and Equipment Across All Service Lines

We can dispatch trucks and demo trailers to handle any-size project. Sprint Waste also has extensive experience with stationary and self-contained compactors for high-volume dry/wet waste or recycling applications.

HEAVY-DUTY ROLLOFF TRASH CONTAINERS

- 20-, 30-, 40-yard sizes available
- Designed for general trash and nonhazardous solid waste
- No seal around door so liquids drains freely

- 20-, 30- and 34-yard units
- Fully gasketed rear-door system with adjustable latches and hinges helps prevent leakage and odor problems
- Better designed for liquid retention
- We offer numerous steel options, electrical control monitoring options, and hydraulic options

SELF-CONTAINED AND STATIONARY COMPACTORS

- 30- and 60-cubic yard steel end-dump trailers with barn-door-style gates
- Able to be live-loaded with concrete or demolition debris using backhoe or excavator

- 30 cubic yard steel round-body demo trailer
- Able to be live-loaded with concrete or demolition debris using backhoe or excavator

ROUND-BODY DEMO TRAILERS

HEAVY-DUTY STEEL DEMO TRAILERS

We Help Customers Achieve All of Their Waste Diversion Goals

With many new construction projects operating under new LEED guidelines, Sprint Waste is focused on providing customers with the tools necessary to achieve LEED credits for recycling and/or salvaging nonhazardous construction and demolition materials. Ask your Sprint Waste sales rep about our LEED-related recycling services, including a custom Waste Reduction Progress Report.
